Sources
UBEM workflow roles
survey methodology:
weights, imputation,
top-codes
CityGML, Energy ADE,
BEDES, Brick
DCAT 3, SKOS, QUDT,
CSVW
codebooks and
user guides
Dataset level
DCAT 3 profile; six facets:
role, statistical nature,
granularity, time step,
access, join keys; weights,
conventions, verification
Variable level
CSVW profile: concept,
QUDT unit and multiplier,
codes, missing codes,
weight and imputation flags
Concept vocabulary
81 SKOS concepts, each defined;
168 verified links to Brick,
BEDES, Energy ADE
For people
YAML schema and catalog,
documentation, OWL ontology
People
find, judge and join
datasets; audit AI
For AI systems
schema card (~4k tokens)
concept cards (~60 tokens each)
dataset cards with conventions
JSON Schema: constrained output
SHACL: checks on AI output
AI systems
