a Dataset card (excerpt)

```
id: chr-cbecs-2018
title: 2018 Commercial Buildings Energy
       Consumption Survey (CBECS)
ubem_roles: [building_characteristics,
             calibration_validation]
statistical_nature: sample_survey_weighted
spatial_granularity: census_region_division
join_keys: [census_region_division,
            building_type]
sampling_weights: FINALWT, FINALWT1-151
conventions:
- applies_to: names starting with Z
  rule: Z<NAME> flags imputation of <NAME>;
        0 reported, 1 imputed, 9 inapplicable
- rule: 994/995 are top-codes, not numbers
- rule: energy in thousand Btu (x1,000)
```

b Variable profiles

MFBTU 'Annual major fuels consumption (thous Btu)'

```
concept: total_energy_consumption (exact)
unit: unit:BTU_IT  multiplier: 1000
aggregation: total_over_period
```

NFLOOR 'Number of floors'

```
concept: floors_above_ground (close)
missing/top-codes: 994 = 10-14, 995 = 15+
aggregation: count
```

ZMONUSE 'Imputation flag: Months in use'

```
is_imputation_flag: true
flags_variable: MONUSE
concept: imputation_flag (exact)
```

c Concept card seen by an AI system (one per concept, ~60 tokens)

```
total_energy_consumption: total site energy consumption. Total site energy over a period, all carriers combined. [group=energy
use; describes=building; unit=unit:KiloW-HR; also called: total energy, site energy, major fuel consumption, annual energy use]
floors_above_ground: number of floors above ground. Count of storeys above grade. [group=building geometry; describes=building;
also called: stories, storeys, number of stories, floor count, levels]
imputation_flag: imputation or quality flag. Indicator that another variable's value was imputed, edited, top-coded or
suppressed. [group=record bookkeeping; describes=dataset_record; also called: imputed flag, edit flag, data quality flag,
allocation flag]
```
